Flat Fixed Frame Acoustic Transparent	***Flat Fixed Frame Screens with Acoustically Transparent material. The screen material features 0,4mm perforations which allows sound from rear mounted loudspeakers to pass through with the minimum of acoustic loss while retaining accurate colour saturation and contrast ratio. The material has a low gain rating of 1.1, keeping contrast levels high and offering a wide even viewing angle with an acoustic loss of less than -2db over midrange frequencies.***

Flat Perm Fixed Frame Edge	***As projection technology has advanced, the ability to project into a precise space has become the norm. Thus, it is no longer mandatory for a wider frame to be used to absorb offset projections. With that, Grandview's Edge Series Fixed-Frame screens offer another beautifully designed option to its collection. With a frame that only measures 12mm in width, it's designed to maximize your viewing experience while minimizing installation space***
